

Figure 1 consists of 12 histograms arranged in two rows of six. The top row is labeled '1000 iterations' and the bottom row is labeled '10000 iterations'. Each histogram shows the frequency of the number of non-zero elements in the vector of the first 1000 iterations of the algorithm. The x-axis for each histogram is labeled 'Number of non-zero elements' and ranges from 0 to 1000 for the top row and 0 to 10000 for the bottom row. The y-axis is labeled 'Frequency' and ranges from 0 to 100 for the top row and 0 to 1000 for the bottom row. The distributions are roughly bell-shaped and centered around 1000 for the top row and 10000 for the bottom row.
